### Anytime Anywhere Remote Printing

Download “HerePrint” APP and upload the file to the cloud server that remote printing can be realized.

### Zero ink Zero toner

Future 800 adopts thermal printing technology that only thermal paper is required for supplies, no need of ink cartridge. Compared with ink jet printer, it frees the trouble of print head jam and can avoid inhaling harmful substances produced by heating toner cartridge, which makes printing safer and more eco-friendly

### High Speed Printing

The print speed is up to 100mm/s that it takes only 3 seconds to print one piece of A4 paper, which is 2-3 times faster than traditional ink jet printer.

### Automatic Cutting

No need to tear the paper manually, the superior built-in auto cutter helps to flflatly cut the paper after printing, which makes every file looks tidy.

### Compact and Extraordinary

Future 800 is simple and delicate, with large paper compartment that can contain 100pcs of A4 paper, meeting your daily printing need

### Wi-Fi connection

Future 800 can easily achieve wireless printing via Wi-Fi connection at home. Due to wire-free, the placing location is more flflexible and you can better experience mobile printing freely

### Exquisite style

Different from traditional heavy printer, it looks simple, beautiful and exquisite with the wood grain panel and pure white printer body, which is a great decoration for your home.

### HerePrint APP

Download “HerePrint” APP and upload the file to the cloud server that remote printing can be realized.

### High-speed printing

Without preheating, just turn it on to print. It can print 20 pieces of A4 paper in one minute.

### Remote Printing

Wherever you are, you can receive the agreements and print it out at home.

### Fashionable Household Expert

Homework, test papers, agreements and reports can be all printed, which is quite convenient for household printing.
